Education

University of Sydney
Bachelor of Computing

Sydney, Australia
Expected 2027

Projects

TrackSense

tracksense.fm · App Store

- Solo-built and shipped an Apple Music-powered app to the App Store, featuring real-time playback sync and shared listening sessions across devices using Firebase Realtime Database.
- Built full-stack: iOS in Swift/SwiftUI with MusicKit; web in React, Vite, and Tailwind CSS; backend logic via Firebase Cloud Functions.

GDG Check-In App

gdgcheckin.com · github.com/rarya618/gdg-check-in

- Built a real-time check-in system with live-updating dashboards, on-the-spot attendee registration, and Bevy integration for event management.
- Frontend in React, Vite, and Material UI; Firebase Auth and Realtime Database for live state sync across devices.

Experience

WriterDuet

Contract Developer

Remote

Dec 2021 – Nov 2022

- Built a Dockerised Node.js FFmpeg pipeline to process and optimise raw audio uploads for streaming-ready output.
- Improved script search performance by migrating indexing to Typesense, reducing query latency and improving retrieval accuracy.
- Developed a Firebase Cloud Functions-based notification system for automated email alerts and workflow triggers.

Freelance

Full-Stack Developer

Remote

Dec 2022 – Present

- Delivered 8+ production web applications for start-up clients, owning full lifecycle from requirements to deployment.
- Built WebRTC-based video communication apps with low-latency messaging and real-time synchronisation.
- Designed RESTful APIs and authentication systems using Node.js, Firebase Auth, and PostgreSQL.

Skills

Languages: TypeScript, JavaScript, Swift, Python

Frameworks: React, SwiftUI, React Native, Node.js, Express, Tailwind CSS, Firebase Cloud Functions

Tools: WebRTC, Docker, AWS Lambda, MusicKit, Typesense, Firestore, PostgreSQL, MongoDB, AWS, GCP

Leadership

GDG Sydney

Organiser

Sydney, Australia

Oct 2025 – Present

- Hosted 7 events for a community of 1,600+ developers; instructing a Build with AI workshop at Google HQ.
- Partner with engineering leaders to deliver technical workshops and panels on emerging technologies.

GDG on Campus – University of Sydney

Co-Organiser

Sydney, Australia

Jul 2024 – Sep 2025

- Scaled the largest tech student community on campus to 2,300+ members through hackathons and workshop programming.
- Spoke at two hands-on workshops on React and Firebase at Google HQ, driving peer learning and developer engagement.
